March 22, 2022

Top Air Conditioner Manufacturers and Companies in the US – The demand for air conditioning devices has increased significantly in the United States as a result of the drastic change in global temperature in recent years. People in the United States are carefully exploring all options for improving the indoor comfort of their houses.

Linquip's website offers all the information you need about various industrial companies and their products. Whether you're a customer looking for specific products or an industry expert, Linquip is here to provide reliable information. Listed below are American Air Conditioner **Manufacturers** and **Companies** in the United States compiled by Linquip.

For more information on how we can help you generate revenue for your business, please contact us. Upgrade your organization's capabilities with **Linquip's Solutions for Each Company Level** to gain a competitive edge. Your business can attract the most customers with our marketing and advertising packages.

Air conditioners are useful in a wide range of applications. Consumers use them to cool their homes, but they're also utilized in industrial settings to keep electronics cabinets cold and cleanrooms clean. We'll look over the most popular air conditioner

manufacturers based on interaction analytics, then dive into the top residential brands and their owner companies as determined by ASM Air in this post.

The market is quickly expanding, with worldwide growth estimated to range from 4% to 6% by 2025. Global warming has reached a worrisome level in recent years, and Americans must now deal with it as well.

## Top Air Conditioner Manufacturers in the US

---

We've collated data on the most popular air conditioner manufacturers based on engagement throughout our platform in the table below. The location of each company's headquarters, the number of workers, and yearly revenues in millions of dollars are all listed. Where information was lacking, dashes were used.

**Table 1: Top Air Conditioner Manufacturers**

<b>Company</b>	<b>Headquarters</b>	<b>Annual Sales</b>	<b>Number of Employees</b>
<u>Liberty Industries</u>	East Berlin	100	172

## **Amana HVAC System**

---

Amana, a 96-year-old brand, got its start in a pretty strange way. George Foerstner, the company's founder, began working on a beverage chiller in 1934. He would bring a cold storage locker for groceries and perishable things two years later, which was an instant hit. Even now, Amana's legacy lives on.

The Houston-based Goodman Group bought the Amana brand in 1997, and Daikin bought a piece of the company in 2014. Amana's innovative digital marketing strategy has paid off handsomely for the company. Their dealer marketing approach and SEO techniques have assisted Amana in reaching new heights in sales. The SEER Range rating for Amana is between 13 and 18.

## **Schneider Electric**

---

Chilled water, room, and tightly linked InRow air conditioners, including ceiling-mounted, rack-mounted, and floor units, are available from Schneider Electric. They provide integrated automation energy solutions for homes, companies, and infrastructure more broadly.

## **York Air Conditioners**

---

York, which was created in 1874, also adheres to the value-for-money idea. The firm emphasizes that because they are made in the United States from the ground up, they will have a greater understanding of customer mentality and temperaments. York integrated what is known as the Air Washing System, which was the precursor of today's sophisticated air conditioning system back in 1914.

The York approach is built on two primary pillars: the brand's record of working on systems for renowned structures such as the Empire State Building, Capitol Hill, and the Sydney Opera House among others. Today, York is a brand owned by Johnson Controls, a Fortune 100 firm that carries with it a wealth of experience. York also uses the most up-to-date technology in all of its goods.

## **EIC Solutions**

---

Thermoelectric, hazardous thermoelectric, and compressor-based air conditioners are available from EIC Solutions in Warminster, Pennsylvania. Air conditioners range in size from 200 to 27,000 BTUs, with military and bespoke options available.

## **Rheem Air Conditioners**

---

Rheem Brothers founded the company in 1925, and it is now one of the world's leading air conditioning producers. Rheem products may be found in practically every country on the planet. Rheem invented the Rheemaire, a revolutionary air conditioning system for homes, in 1956. Rheem is owned by Paloma Industries, which also owns Ruud, a well-known brand. In 2016, Rheem formed a strategic collaboration with Fujitsu, Japan, to design ductless cooling systems in that nation, allowing it to easily capture a greater market share when the American market shifts to this method.

## **Air Innovations**

---

Air Innovations, based in North Syracuse, NY, creates temperature, humidity, pressure, and filtration systems. Cleanroom air conditioners, OEM and non-OEM environmental control, specialist commercial and residential, explosion-proof HVAC, and COVID-19-related filtering systems are all available.

## **Goodman Air Conditioning and Heating**

---

Goodman is a global leader in air conditioning technology as well as a market leader in the United States. Apart from its excellent energy-efficient models and product longevity, Goodman offers a one-of-a-kind production technology called Spot on manufacture. Goodman has built a position for itself in the minds of millions of pleased consumers for over 40 years, thanks to its exceptional manufacturing techniques. Since 2012, Goodman has been a subsidiary of Daikin Industries Limited, the world's largest air conditioning company. Goodman benefits greatly from being a part of the Daikin group. The items are made in ISO 9001 and 14001, providing them with a distinct competitive advantage. It features state-of-the-art plant facilities worth \$400 million in Houston, Texas.

## Flagro

---

Flagro USA is a company based in Savage, Minnesota, that sells air conditioners, fans, grills, heaters, accessories, and secondhand equipment. Vertical air conditioners with capacities ranging from 4,000 to 9,500 CFM and capacities ranging from 10 to 30 tons are available.

## American Standard

---

Without question, the company offers some of the quietest and most energy-efficient equipment in its lineup. American Standard machines are the most sought-after in the United States, with SEER ratings up to 22, unparalleled quality, and variable speed control. The advertising campaign's tagline says it all: "Create your own sanctuary, and our professionals will assist you." We provide the best value for money, are the quietest, and use the least amount of energy — the hallmark line concludes.

## Top Air Conditioner Brands and Their Manufacturers

---

Table 2 shows the ranking of the top home air conditioner brands based on the value-for-money evaluation. The table includes information about each brand's parent firm, such as its worldwide headquarters location, and year of establishment. Where information was lacking, dashes were used.

**Table 2: Top Air Conditioner Brands and Their Manufacturers**

<b>Brand</b>	<b>Headquarters</b>	<b>Year Founded</b>
<u>Goodman Manufacturing</u>	Houston, Texas	1975
<u>Mitsubishi Electric</u>	Tokyo, Japan	1921
<u>Bryant</u>	St. Louis	1904
<u>Carrier Corporation</u>	Farmington, Connecticut	1915
<u>York</u>	Pennsylvania	1874
<u>Amana</u>	Waller, Texas	1934
<u>Trane Technologies</u>	New York	1871
<u>Ingersoll Rand Inc.</u>	Davidson, North Carolina	1859

<b>Brand</b>	<b>Headquarters</b>	<b>Year Founded</b>
<u>Lennox International Inc.</u>	Richardson, Texas	1895
<u>Nortek Global HVAC</u>	O'Fallon, Missouri	1919

## **Goodman Manufacturing**

---

Air conditioners, heat pumps, package units, gas furnaces, air handlers and coils, ductless systems, temperature controls, and Daikan commercial air conditioners are all available from Goodman Manufacturing, which is based in Waller, Texas.

## **Mitsubishi Electric**

---

Room, package split type, heat pumps, variable refrigerant flow systems, ventilators, air curtains, and compressors are among Mitsubishi Electric's light commercial air conditioner products. Room and full-system choices, as well as upgrades, are available in their consumer air conditioners.

## **Bryant**

---

Bryant Heating and Cooling Systems offer household air conditioners with variable speeds, one stage, and two stages, as well as light commercial split and rooftop units. In addition to furnaces, controllers, and air quality equipment, the firm is situated in Indianapolis, Indiana.

## **Carrier Corporation**

---

Carrier Corporation, headquartered in Palm Beach Gardens, Florida, provides home and commercial HVAC systems, as well as transportation and commercial refrigeration. They provide antimicrobial-coated rental and temporary systems, as well as more regular HVAC items including split and ductless systems.

## **York**

---

York International Corp., based in York, PA, also sells variable, single, and two-stage domestic air conditioners. Air, ductless, chilled water, variable refrigerant flow, and packaged and split DX systems are among their business offerings.

## **Amana**

---

The headquarters of Amana Heating and Air Conditioning is in Waller, Texas. Air conditioners, ductless systems, gas furnaces, air handlers and coils, heat pumps, air quality products, temperature control systems, and packaged units are among the company's goods.

## **Trane Technologies**

---

Trane Technologies is a company that specializes in air conditioning. Energy storage, packaged and split systems, air handling, chillers, and chilled water systems are all available from the firm. The main office is in Dublin, Ireland.

## **Ingersoll Rand Inc.**

---

Ingersoll Rand Inc. is a market leader in air, fluid, and energy solutions based in Davidson, North Carolina. This company pioneers environmentally friendly and productive working environments. Its products include pumps, compressors, and other flow-creation technologies used in industrial and medical applications.

## **Lennox International Inc.**

---

Established in 1895, Lennox International Inc. manufactures residential and commercial HVAC equipment based in Richardson, Texas. A wide range of HVAC products is also provided by the company for use in large industrial and commercial applications.

Its innovative technology and design have made Lennox International Inc. a name to be reckoned with. A variety of communication and variable speed systems have been developed and designed by the company to ensure optimal performance. A wide range of product lines is available for the company's customers, including a variety of heating and cooling components, HVAC systems, indoor air quality enhancements, and other products.

## **Nortek Global HVAC**

---

Nortek Global HVAC, formerly Nordyne, is one of the world's leading HVAC equipment manufacturers and in North America, it ranks among the top HVAC manufacturers. Heat pumps, gas furnaces, and air conditioners are the company's main products. The company was founded in 1919 and is based in O'Fallon, Missouri.

Additionally, Nortek Global HVAC manufactures air handlers, coils, and thermostats. A wide range of HVAC products and solutions are offered under the brands Frigidaire, Tappan, Westinghouse, and Gibson.

## Conclusion

---

This post includes a list of the most popular air conditioner manufacturers. We hope you find this material useful in your sourcing.
