

Pallet Suppliers in USA & Worldwide in 2022

: 8/14/2022

Table of Contents

Pallet Suppliers in USA & Worldwide in 2022 – In 2021, the market for pallets on a global scale was worth US\$ 57.6 billion. Pallets are flat platforms that may be used with a front loader or a forklift to store, handle, assemble, and transfer goods from one location to another. They are made from various materials, including metal, wood, and plastic pallets. Pallets are more lightweight, portable, and durable than cardboard boxes and plastic wrapper-based containers. As a result, they make loading and unloading easier and guarantee the product is delivered safely.

On the Linquip website, among the many options available to you, you will find all the information you need to know about the pallets, as well as information regarding this marketplace. You can count on Linquip to provide you with as much general and reliable information about this topic, whether you're a professional or a customer looking for a proper company. We recommend you review a list of all [Pallet Suppliers and Manufacturers](#) available in Linquip.

We would be delighted to provide you with more information on how we can help you generate revenue within your industry. Don't hesitate to contact us if you have any questions! With [Linquip's Solutions for](#)

Each Company Level, you will be able to upgrade the capabilities of your organization in order to gain a competitive edge by taking advantage of a wide range of options to enhance your organization's performance. If you are looking for the simplest or the most sophisticated marketing and advertising package for your business, we can help you ensure that your company gets as many customers as possible to grow your business.

Basics of Warehouse Pallet Shelving

The correct pallet racking solution may have a significant impact on your bottom line. A well-designed system may boost efficiency, expand warehouse storage space by 40% or more, and assist your business in adapting to changing inventory requirements. It's tough to know which style of pallet rack is appropriate for your business. Some individuals use a selected pallet rack because it is the cheapest or because they believe it is the most adaptable, however it is ineffective for specific processes. Continue reading to learn about the many types of pallet racking systems and the optimal uses for each.

A Warehouse Pallet Shelving System (Reference: industrialshelving.com)

What Are Pallet Racks Made Of?

Pallet racks may be arranged in a variety of ways to keep your items arranged and maximize the area in your warehouse. What are they made of? Pallet racks are made out of horizontal **steel beams** that connect vertical steel frames. Pallets can be added to a bay created by two frames and beams. The height of the pallet racking frames and the distance between the beams will specify how much weight and how many pallets your warehouse racking can support.

Warehouse Pallet Racking Systems

Selective Pallet Rack

The most common and adaptable pallet racking technology in the business is selective pallet racking. It allows for optimum space use and rapid access to any cargo stored by any type of forklift. Debris-resistant, easy-to-clean structural steel is offered for this style of rack (ideal for food handling operations). General warehouse, manufacturing, and low-turnover retail are all good candidates.

Back Racking / Push-Back Rack

Pallets are stored on carts that slide forward when the pallet in front is removed in a push-back rack. It's comparable to how grocery store refrigerated beverages are organized. Pallets are fed and retrieved from a single lane, which cuts down on picking times and makes these racks excellent for applications with a large number of picking faces. This is a common choice for food-related businesses. Suitable for: ordinary warehouse, retail, and food production

Double Deep

One row of selective racking is placed behind another to produce double-deep racks. This is the most cost-effective method of constructing high-density storage. As a result, storage capacity may be increased by 40%. Recommended applications include conventional warehousing and manufacturing.

Pallet Flow Rack

Pallet flow racks, also called gravity flow racks, use slanting racks with a first-in/first-out (FIFO) loading method. At the top end, new pallets are added, while at the lower end, old pallets are removed. Pallet flow storage, as opposed to drive-in or traditional pallet rack systems, may double or triple capacity, making it perfect for freezer warehouses, food distribution centers, and the storage of high-volume, perishable consumer items. Grocery, retail, food, and freezer are all good choices.

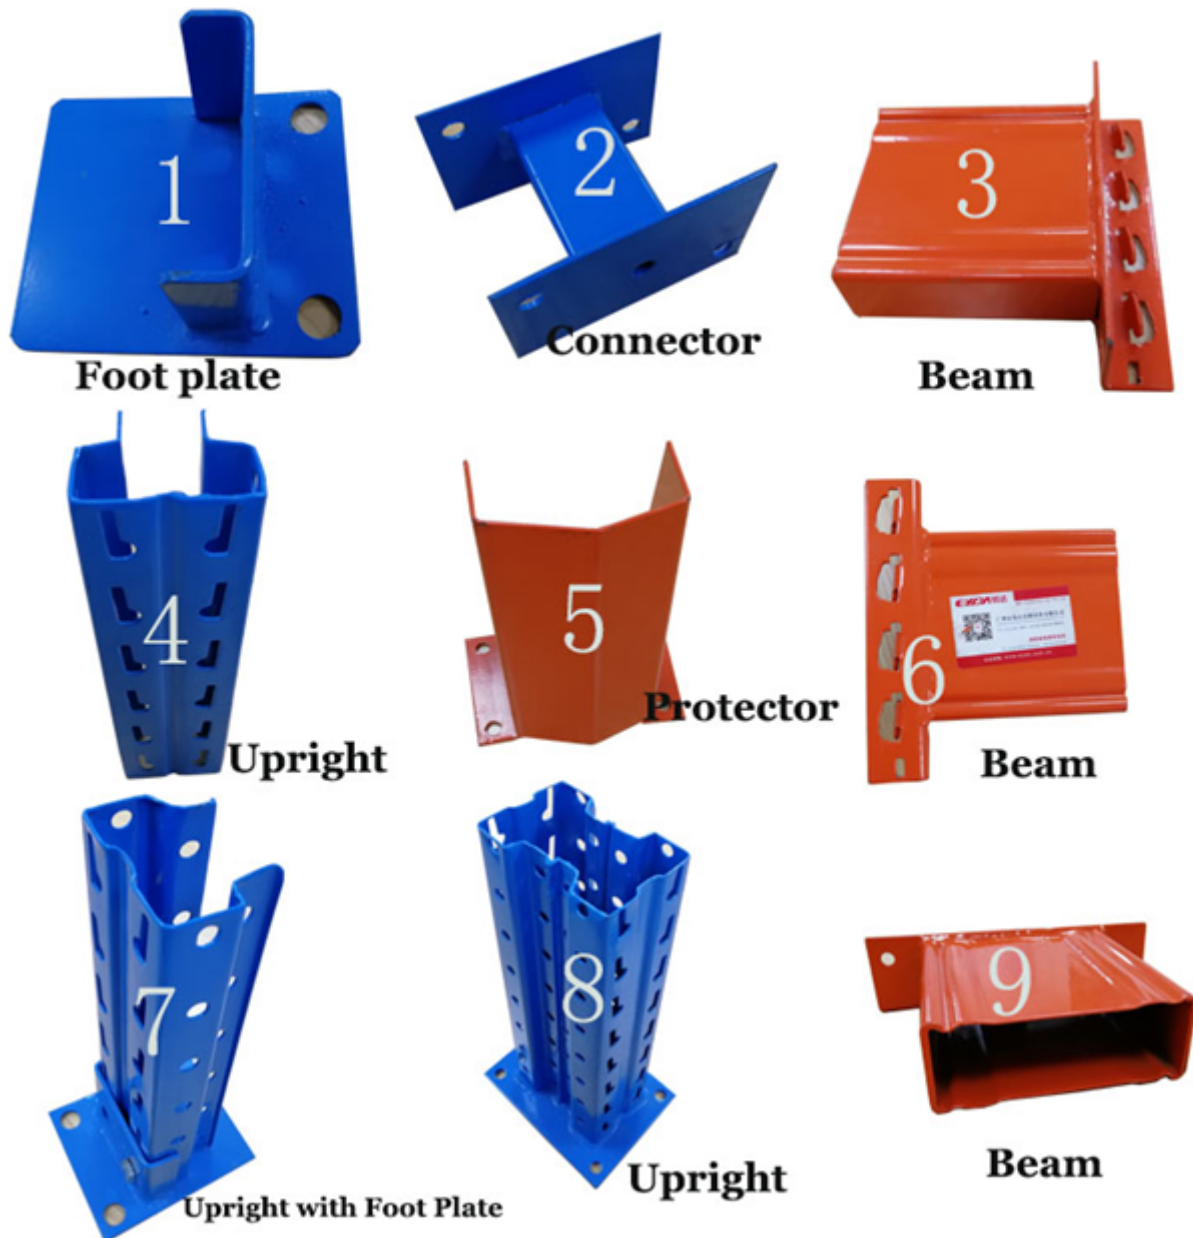

Roll Formed Cantilever Rack

Cantilever Rack is great for storing longer, bulkier products like carpet rolls, lumber, furniture, tubing, tires, textiles, pipes, and similar things since it has no aisle uprights to hinder the usage of horizontal space. Joint pin locks that may be adjusted in height are sturdy, safe, and easy to use. Drip-in decks and spring-loaded entrance guides are examples of accessories that improve safety and protection. These racks are made of structural steel or roll-formed steel. Lumber, tires, and pipes are all good candidates.

Drive-In/Drive-Thru Rack

Drive-In/Drive-Thru Rack requires fewer aisles than traditional (selected) pallet racks, allowing you to store up to 75 percent more pallets. Forklifts drive right into the racks, which can hold up to six pallets. Drive-in Rack has a shared entrance/exit, whereas Drive-Thru Rack has its own entry and exit.

The highest high-density storage solution available is the drive-in/drive-through. The welded frame structure is exceptionally stiff and strong. With a variety of arm and rail combinations, it's possible to employ either roll-formed or structural steel components. Reduces space expenses and allows for greater goods to be carried. Designed to be useful, attractive, and long-lasting. Large-volume storage of identical items, general warehousing, freezer/cooler, and high-turnover retail products are all recommended.

New Pig

Spill containment pallets with and without hard tops, accessories like pallet drip trays and spill pallet tarps, and roll top spill containment pallets are all offered by Tipton, Pennsylvania-based New Pig. The company New Pig specializes in solutions for spills, drips, and leaks.

Illing Company, Inc.

In Germantown, Wisconsin, the Illing Company sells regular spill pallets and intermediate bulk containers (IBCs), some of which include drains and lids. The business also provides packaging, such as barrels, cans, buckets, totes, closures, and other containers.

Elkhart Plastics, Inc.

Solid wall plastic pallets are provided by Elkhart Plastics, a bespoke plastic producer in South Bend, Indiana. The pallets come with flat tops, raised lips, and steel reinforcements, in addition to being composed of FDA-approved polyethylene.

Alpha Packaging, Inc.

Pallets made of wood and plastic, including closed-deck, industrial, nestable, high-impact, and economical models, are available from Alpha Packaging. The firm is situated in Greenwood, Arkansas, and specializes in packaging.

Warehouse Equipment & Supply Company, Inc.

Plastic, steel, galvanized steel, and aluminum pallets are offered by Warehouse Equipment & Supply Company in Birmingham, Alabama. Types include nested, tiny, flat top, four-way hand truck, and spill containment. The business focuses on providing products for material handling and warehouses.

TranPak, Inc.

With its headquarters in Madera, California, TranPak provides services to the food and beverage, agriculture, chemical, industrial, high tech, pharmaceutical, recycling, and retail industries. The business sells plastic bins, crates, and liquid containers in addition to export, reuse, point-of-purchase, and bespoke plastic pallets.

Action Pak, Inc.

Action Pak, Inc. is a packaging company in Bristol, Pennsylvania, that offers bespoke pallets for business, industrial, DOT, military, and fire retardant applications. They also provide contract design, sourcing, packaging, filling, and assembly services.

Mil-Spec Packaging of Georgia, Inc.

Mil-Spec Packaging of Georgia services the commercial, industrial, export, and military markets from its base in Macon, Georgia. Custom corrugated packaging, pallet services, military-specific packaging, and labeling are all offered by them.

Stephen Gould of the Carolinas, Inc.

Wood pallets are a component of the bespoke retail, protective, and industrial packaging offered by Charlotte, North Carolina-based Stephen Gould of the Carolinas. Crates, cardboard, foam, reusable containers, bags, molded fiber, and biodegradable plastic are a few of their other packaging options.

Quantum Storage Systems

Plastic pallets constructed from recycled HDPE are available from Quantum Storage Systems in Miami, FL, and are appropriate for use with food. Storage solutions, such as bins, shelves, cabinets, and organizers, are the company's area of expertise.

Kamps Inc.

Wooden shipping boxes and crates are also available from Kamps, Inc., along with new and recycled pallets made of wood, plastic, corrugated, heat-treated, and bespoke materials. The Grand Rapids, Michigan-based business also recycles pallets.

Global Pallet Suppliers

The following table lists the best Pallet Suppliers worldwide. The companies are ranked based on their size. Furthermore, the global headquarters location of each company and the year it was founded are also presented. The table is followed by descriptions of these companies.

Brambles Limited

Supply-chain logistics firm Brambles Limited does business principally under the CHEP brand in more than 60 countries. It concentrates on the outsourced management of pallets, crates, and containers while specializing in pooling unit-load equipment and related services. The firm mainly serves the fast-moving consumer goods, fresh produce, beverage, retail, and general manufacturing industries. It is one of the most environmentally friendly logistics companies in the world.

CABKA Group

Pallets and big containers are made by the CABKA Group from recycled plastic to provide high-quality, sustainably manufactured load-carrier solutions that improve the performance of all logistical systems. The business now modifies supply-chain procedures and plastic materials, enhancing their effectiveness, sustainability, and consumer-friendliness. Additionally, CABKA produces and sells a broad range of plastic pallets under the trademark CABKA IPS for the international shipping of goods.

Rehrig Pacific Company

An American company called Rehrig Pacific Company makes bins, crates, and containers. The industries receiving the items include those in baking, material handling, dairy, agriculture, beverages, waste management, and recycling collecting. With regard to pallets, garbage and recycling containers, and supply chain solutions, the firm is the market leader thanks to its scientific curiosity and almost molecular level of attention to detail. Today, it provides advanced RFID monitoring, unmatched safety, and efficiency thanks to its grasp of the science behind the trash and recycling processes as well as the supply chain.

Schoeller Allibert Services B.V.

For more than 60 years, Schoeller Allibert has been creating Returnable Transit Packaging (RTP) via invention, development, design, and manufacture. Numerous foldable small and big containers, trays and beverage crates, pallets and dollies, foldable IBCs, and UN pails are among the products made by this company. The corporation focuses on a number of important industries, including furniture, beverage, retail, industrial production, agricultural, automotive, food and food processing, e-commerce, chemicals, pharma, and cosmetics. In addition, it produces high-quality, long-lasting, and eco-friendly goods that help clients increase the profitability and efficiency of their supply chains, cut down on transportation expenses, cut waste, and promote their brands as being environmentally friendly.

LOSCAM International Holdings Corporation Limited

For pooling and returnable packaging solutions for supply chains, LOSCAM has a solid reputation. It promises to promote environmental sustainability and standardization for the logistics sector and to get the most partners for pooling solutions in the Asia-Pacific region. It aims to provide supply chain participants with high-quality, effective, creative, and sustainable returnable packaging solutions and services. It also provides a dependable, precise, and globally coordinated approach to benefit clients, staff members, and shareholders. Pallets, intermediate bulk containers, produce bins, collars, and lids

are among the products made by the firm and are sold in the automotive, agricultural, retail, hardware, horticultural, and industrial sectors.
