

Top Machine Shops in Houston, TX

10/27/2022

Table of Contents

Top Machine Shops in Houston, TX – Houston, Texas, the fourth-largest city in the US, continues to be a leader in the oil and gas sectors, therefore, it is not surprising that many of the local machine shops serve this market. Consequently, a lot of shops accept big machine work. However, there are numerous shops that may offer machining services to companies in the construction, power generating, aerospace, semiconductor, and general manufacturing industries, among others. Naturally, CNC machining is more common, but many firms also offer manual turning and milling when necessary. Many shops also provide other related services like EDM, fabrication and assembly, heat treatment, engineering, prototyping, and similar ones.

We would be delighted to provide you with more information on how we can help you generate revenue within your industry. Don't hesitate to contact us if you have any questions! With **Linquip's Solutions for Each Company Level**, you will be able to upgrade the capabilities of your organization in order to gain a competitive edge by taking advantage of a wide range of options to enhance your organization's performance. If you are looking for the simplest or the most sophisticated marketing and advertising package for your business, we can help you ensure that your company gets as many customers as possible to grow your business.

Listed below are the Top Machine Shops in Houston, TX. Each company's information includes its headquarters, sales, year of foundation, and the number of employees. US million dollars are used to

measure annual sales. Following the table are summaries of each company.

Company name	Year founded	No. of Employees	Annual sale	Activity
Montgomery Machine	1975	50-100	+\$250 Mil	Large part machining
Xometry, Inc.	2013	500-999	+\$200 Mil	CNC machining
Knust-Godwin	1998	200-500	\$25-50 Mil	CNC/Contract manufacturing
USA Industries	1959	50-100	\$25-50 Mil	CNC machining
Hahn & Clay	1908	200-500	\$10-25 Mil	Large part machining
Conroe Machine	2000	100-200	\$10-25 Mil	CNC machining
Langham Creek Machine Works	1989	50-100	\$10-25 Mil	CNC machining
Marberry Machine	1978	50-100	\$10-25 Mil	Large part machining
Sunbelt Machine Works	1975	50-100	\$10-25 Mil	CNC machining
Engelbrecht Mfg	1995	10-50	\$5-10 Mil	CNC machining

Montgomery Machine

In Houston, Montgomery Machine has a 45,000 square foot facility where it focuses on welding overlay and medium to heavy machine work. Customers are drawn from heavy industries, including oil and gas, power production, paper, marine, and others.

Xometry, Inc.

Engineers, product developers, designers, and others can use the bespoke online CNC machining service offered by Xometry, Inc. The business provides bespoke CNC quotations on more than 40 materials, including commonplace aluminum and acetal, as well as high-tech titanium and specialized polymers like PEEK and Teflon.

Knust-Godwin

In Katy, Knust-Goodwin runs a 240,000 square foot contract manufacturing factory. The business provides CNC turning and milling services with clients in the aerospace and military, oil and gas, semiconductor, and related industries. Additive manufacturing, drilling, EDM, peening, and other services are available as well.

USA Industries

The power, oil and gas, chemical, refining, and aerospace sectors can use USA Industries' CNC milling and turning services. Pulleys, alignment pins, collars, specialized turbine flanges, and other components made to order are available. The business also makes heat exchanger tooling, orifice plates, and tube plugs.

Hahn & Clay

Hahn & Clay provides big component machining for the heavy industries of construction, marine, forging, forestry, oilfield, etc. The machining of flange and seat facings, thrust collars and journals for turbine rotors and motors, O-ring grooves, etc., are examples of typical tasks. The business has been in existence since 1908.

Conroe Machine

In Conroe, Conroe Machine has a 65,000 square foot milling factory. The business also provides hardfacing, fabrication, repair, and rework services in addition to precise CNC machining. The business serves the machining requirements of the oil and gas industry and related ones.

Langham Creek Machine Works

Specialized in contract CNC turning and milling of rare materials is Langham Creek Machine Works. The business provides certified welding, heat treatment, inspection, and wire and sinker EDM services.

Marberry Machine

Marberry Machine specializes in big component CNC machining, with milling and turning capacities of up to 45,000 lb. and 216 in. The business serves heavy industries, including mining, oil & gas, power generation, etc. It also provides manual milling and turning services.

Sunbelt Machine Works

Sunbelt Machine Works runs almost 100 CNC machines at its Stafford plant, where it provides CNC milling and turning services. EDM and stamping are among more offerings.

Engelbrecht Mfg

The CNC machining of complicated shapes with tight tolerances, including nickel alloys, is a specialty of Engelbrecht Manufacturing. The firm serves a variety of sectors, from the oilfield to fluid control, and provides prototype service, assembly, and project management.

Hyseco

Internal and external threading, turning, drilling, milling, and boring, among other low- to medium-volume machining operations, are all specialties of Hyseco. In addition to providing EDM, fabrication, and hydraulic repair services, the firm also produces bespoke cylinders and hydraulic parts.

Midway Machine

Among others, industries in the biomedical, energy, subsea, and marine industries can use Midway Machine's short-run to production level CNC machining services. In South Houston, the firm runs a 25,000 square foot factory. EDM, gun drilling, prototyping, etc., are additional capabilities.

Burgess Specialty Fabricating

Burgess Specialty Fabricating provides support with company development, design, and QA in addition to delivering precision multi-axis turning and milling services. The firm provides precision grinding, sheet metal fabrication, lapping, etc., and services sectors like aerospace and valve production.

Craig Instruments

Customers in the oil and gas sector may turn and mill using CNC and manual equipment from Craig Instruments. Laser engraving and plunge and wire EDM are other services. Most metals, including high-nickel alloys, are machined by the business.

Ed's Precision Manufacturing

Ed's Precision Manufacturing specializes in the production of fasteners and provides bespoke Swiss screw machining, CNC turning, and milling services. The business works with the majority of metals and polymers, and its skills range from prototype to high-volume manufacturing.
