

# Top Manufacturing Companies in Utah in 2022

 [linquip.com/blog](https://linquip.com/blog)

October 15, 2022

**Top manufacturing companies in Utah in 2022**– Computers and electronics products, including communications equipment, computer microchips, and scientific instruments, are Utah’s leading manufactured products. Manufacturing of primary metals is the second largest category in the state, with steel, aluminum, and copper being the most common. In third place are processed foods and beverages, including baked goods, dairy products, meat products, and snacks.

Medical equipment and supplies manufacturing have been the sector with the highest growth rate in recent years, then aerospace products.

You can find all the resources you need about various industrial companies and their products on the Linquip website, among the many products and services available. Linquip can provide as much general and dependable information as possible to you, whether you’re an industry expert or a customer looking for specific products. Linquip compiles a list of local Utah **Industrial Manufacturers**.

## doTerra International

Since its founding in 2008, doTerra has produced therapeutic-grade essential oils, spa products, and nutritional supplements under contract with manufacturers. Sales are reported to be \$2 billion a year by the company. A spectacular representation of

doTERRA's growth and potential is the company's Global Corporate Headquarters in Pleasant Grove, Utah. On the more than 610,000 square feet campus are more than 3,000 employee jobs, and the campus is open to the public.

## **Dyno Nobel**

---

An explosives manufacturer, Dyno Nobel, is a wholly owned subsidiary of Incitec Pivot Limited. The company operates in Africa, Indonesia, Mexico, South America, Papua New Guinea, and Turkey. The Dyno Nobel company manufactures explosive products and offers blasting services worldwide through a distribution network.

## **Young Living Essential Oils**

---

With the help of their proprietary Seed to Seal production process, they produce the world's most authentic, best essential oils. Their goal is to provide pure, powerful products infused with essential oils that can change the lives of families and lifestyles.

As a community of wellness, Young Living began in 1993. They developed more farmland in Utah and Idaho and began cultivating lavender, peppermint, melissa, clary sage, and other herbs after establishing Young Living in 1994. This distillery is the largest and most technologically advanced in North America. It was built by Young Living as a result of a growing demand for essential oils. The Seed to Seal process was developed by Young Living in harmony with these efforts, which ensures the potency and integrity of essential oils at every stage of production.

Located in Lehi, Utah, Young Living is headquartered and operates offices internationally, including Australia, Europe, Canada, Japan, Singapore, and farms all over the world.

## **BioFire Diagnostics, LLC**

---

In the field of molecular diagnostics, BioFire Diagnostics, LLC (now bioMérieux) has pioneered breakthrough advances in syndromic infectious disease testing for more than 25 years. No other company has FDA-cleared and CE-IVD-marked assays for more pathogens than BioMérieux's Global Center of Excellence for Molecular Diagnostics.

BioFire Diagnostics, based in Salt Lake City, manufactures DNA analysis machines for molecular diagnostics, biodefense, and water/food testing and was instrumental in developing a rapid COVID-19 diagnostic test.

## **Ultradent Products, Inc.**

---

In addition to making dental procedures more predictable and efficient, Ultradent Products, Inc., is a leading provider of high-tech dental materials, devices, and instruments. There are currently subsidiaries of Ultradent in Germany, Italy, Brazil, Spain, Malaysia, China, and Japan, which employ approximately 1,900 people and manufacture and package more than 500 materials, devices, and instruments.

Although Ultradent has grown into a global company, a majority of its skilled and professional manufacturing positions remain in the United States, creating jobs for a diverse community.

The company's products are used worldwide in dental, veterinary, government, and university laboratories.

### **Lifetime Products, Inc.**

---

Lifetime Products Inc. was founded in 1986 as a privately held company. The company's main products include folding chairs and tables made of polyethylene, benches and tables for picnics, basketball equipment for home, coolers, kayaks, paddleboards, lawn and garden items, as well as OEM steel and plastic products from other companies.
