

The 16 Best Power Tool Brands in 2024

 linquip.com/blog/best-power-tool-brands

December 20, 2022

Our guide to the best power tool brands will help you find the best brand that meets the demands of DIY users and professionals. In construction and woodworking, some people swear by certain brands. Stepping out of your comfort zone and taking on new challenges can be daunting, especially if you end up with a product that ruins your work. We have put together a comprehensive review of the best power tool brands if you are looking to expand your horizons.

Linquip provides you with an abundance of information about power tools in order to give you a broad perspective. You can learn about power tools right now so that you can do your job more efficiently. You can learn more about what Linquip can provide for your situation by visiting our “[**Tools and Instruments**](#)” page.

In the middle of a sea of power tools, you might be having trouble choosing the right one for your application. Linquip offers a wide range of [**Tools and Instruments Products**](#), so you can choose the right one based on your application. Using the Linquip Platform, you can get quotes from multiple [**Tools and Instruments Suppliers and Companies**](#) quickly.

Homeowners who occasionally do DIY home improvement projects or professionals who use power tools every day can find it difficult to find the best brand for their needs. Several brands of power tools claim to be the best on the market, but how do you determine which are the most trustworthy?

Here are a few of the best power tool brands we trust, so you can decide which one suits your needs. It is essential to remember that not every best power tool brand is suitable for everyone. Mixing and matching brands can help you gain hands-on experience with different tools. Others prefer tools that come with a substantial warranty or are reasonably priced. Buying power tools isn't a one-size-fits-all affair, as one tool might be suitable for one person and not for another.

List of 16 Best Power Tool Brands in 2024

According to the factors that we will mention in this article, Here is the List of 16 Best Power Tool Brands in 2024:

1. **Makita**
2. **Dewalt, Black & Decker**

3. **Milwaukee**
4. **Bosch**
5. **Ridgid**
6. **Craftsman**
7. **Ryobi**
8. **Kobalt**
9. **Hitachi / Metabo HPT**
10. **Skil**
11. **Husky**
12. **IRWIN**
13. **WEN**
14. **Festool**
15. **Porter-Cable**
16. **Hilti**

Factors to Consider

Comparing brands can be challenging, especially when the products within each brand differ greatly. In some cases, a saw from one brand may be best, while a drill from another may be better. We compared a number of factors to determine which brand was the best. These are the factors we considered:

Views of Other Users

Choosing our favorites would merely be a matter of listing our personal preferences rather than collecting info on what other professionals and homeowners think.

Taking a close look at the opinions of other homeowners and professionals provides us with a much more objective perspective on power tool brands. Everyone from the occasional DIYer to the professional carpenter must be taken into consideration during this process.

In addition to speaking to other users, we should also browse the ratings for different sites and tools online. This allows us to consider a wider audience base, even those we can't have the opportunity to speak with.

As with ratings, online popularity is also an indicator of the brand's popularity. For example, we can specifically examine Google Trends to determine which brand has the highest amount of user participation or searches online.

Durability, Reliability, and Longevity

If you're buying a power tool, you shouldn't invest in a product that breaks after a few uses. As part of our process, we first review consumer reviews on the internet and speak with individuals who have used the various tools to find out whether they felt the tools were reliable and durable.

When used professionally, the best brands are more robust, reliable, and long-lasting. However, when used by homeowners, the best brands are also durable and sturdy, although they aren't as heavy-duty as professional brands.

Price and Warranty

A final factor that we consider is price and warranty. Rather than picking a brand solely on the basis of its affordability, we select a brand that is reasonably priced based on its features and durability. The warranty length also plays a key role in our decision.

In addition to giving you better value for your money, warranty length also tells us a lot about the quality of the product. The longer the warranty period, the higher the quality and durability of the brand.

Top Power Tool Brands In The Market

Our goal in this section is to provide you with some recommendations on the best power tool brands. Since the “best” depends largely on your preferences and intentions, an overall winner is impossible to determine. In light of this, all of the brands listed in this article have a longstanding reputation and are highly impressive.

Brand name	Headquarters	Year founded	Number of employees
<u>Makita</u>	Japan	1915	13,000+
<u>Dewalt, Black & Decker</u>	Towson, Maryland, U.S.	1924	13,000

Brand name	Headquarters	Year founded	Number of employees
<u>Milwaukee</u>	Brookfield, Wisconsin, U.S.	1924	5,500
Bosch	Germany	1886	10,001+
<u>Ridgid</u>	Elyria, Ohio, U.S.	1923	201-500
Craftsman	Towson, Maryland, U.S.	1927	--
<u>Ryobi</u>	Japan	1943	9,000
Kobalt	Mooresville, North Carolina, U.S.	1998	200
Hitachi / Metabo HPT	Braselton, Georgia, U.S.	1980	201-500
Skil	Naperville, Illinois, U.S.	1926	51-200

Makita

The first power tool brand on our list is Makita, not because of its higher price tag but because of its impressive quality. Makita has quickly acquired the reputation of being one of the most trusted brands for power tools.

The brand was founded in 1915 and has been around all those years, but it wasn't until 1958 that it made a major impact in the power tools industry.

With their outstanding planer, they made their way to power drills and then expanded into all the different woodworking tools in use today.

The Makita brand has become synonymous with quality and versatility, offering a variety of power tools as well as cordless tools you can take with you. Makita has become one of the most popular professional brands for its cordless platform. Their products are available everywhere and are a favorite among professionals.

Dewalt, Black & Decker

As one of the oldest and best-known tool manufacturers on the market, Dewalt is best known for its radial arm saw, which was invented by **Raymond E. Dewalt**, its namesake. In response to what was viewed as an amateur power tool brand, Black & Decker acquired it, rebranded it, and created more innovative products.

In addition to power tools and specialized tools, Black & Decker also manufactures everyday products, such as portable electric drills, from which they became a household name.

Dewalt, on the other hand, specializes in power tools and offers cordless and corded models. The company manufactures its own batteries for cordless models. Rather than becoming a single brand with one goal, Dewalt and Black & Decker are focused on different parts of the power tool market.

Milwaukee

Milwaukee is one of the leading tool brands in the automotive, electrical, and HVAC industries. Milwaukee offers competitive tools for professionals as well, making Milwaukee one of the best brands for industry specialists.

After being founded in 1924, Milwaukee has been owned by multiple companies, but their quality remains durable and dependable. Milwaukee is now owned by Techtronic Industries, a Japanese company that also owns Ryobi.

They were first successful with the Hole Shooter, a one-handed drill that was a big hit. From there, their success grew. Today, they provide construction tools, power tools, outdoor equipment, and much more. Furthermore, they have many cordless tools, resulting in the cordless revolution that has spread to most other brands.

Bosch

With its roots dating back to 1886 in Germany, Bosch is one of the oldest brands on the list. Bosch produces excellent tools that place quality in front of quantity, yet it is owned by a charitable organization.

They offer great value, top-of-the-line quality, and reliability, making them incredibly impressive. Bosch is an expensive option, though, so it's primarily for professionals or semi-professionals.

As with other early pioneers of the cordless revolution, Bosch made its mark in early battery technology as well. Their well-built batteries are durable and long-lasting.

Ridgid

As a brand specifically catering to plumbers and HVAC professionals, Ridgid has become a leading manufacturer of pipe wrenches since its founding in 1923. The red pipe wrench is a top-of-the-line plumbing tool available.

Ridgid is a popular brand among contractors and handymen. Despite its limited power tools, their impact drivers, drills, and sizes are very impressive.

Aside from that, Ridgid offers the best warranty of all brands, with a three-year warranty that comes with additional features not offered by other brands.

Craftsman

In 1927, Sears founded Craftsman as a company owned by Sears. Stanley Black+Decker became the parent company of Craftsman, making Stanley Black+Decker well-known in the United States.

The acquisition of Craftsman by Stanley Black+Decker in 2017 from Sears was not without incident.

According to the agreement, both companies are permitted to manufacture, market, and sell power tools under the Craftsman's name for a period of 15 years.

There is a wide variety of high-quality corded, gas-powered, and cordless tools and outdoor equipment available from Craftsman today. Craftsman's Weedwhacker brand, which includes string trimmers that are widely used, is its most well-known product line.

Through its Versa System, Craftsman also provides consumers with a good selection of other tools and accessories. Tools such as hammers, pliers, screwdrivers, saws, and more can be stored and organized with the system.

As with other Stanley Black+Decker products, Craftsman marketing targets homeowners and hobbyists. However, many professionals are attracted to the company because of its high quality, durability, and wide product range.

Ryobi

Many homeowners may find Ryobi to be the best tool brand. Ryobi is owned by Techtronic Industries, which owns Milwaukee. Ryobi is more affordable and lightweight than Milwaukee, so it is definitely a better choice for homeowners and semiprofessionals.

Among Ryobi's most impressive features are how many products they offer. You will find nearly any hand or power tool you will ever need. They also sell plenty of highly affordable kits that can save you time and money.

There are a variety of tools available from this company, including drills, impact drivers, and circular saws, all available cordless or corded to suit your needs.

Kobalt

Kobalt is Lowe's tool company. They supply both homeowners and professionals, although they tend to be more suitable for homeowners and semi-professionals.

Although Kobalt is often compared to Ryobi for its quality, Ryobi is ranked higher due to its longer presence in the industry and larger product line. The XTR line of products is incredibly powerful, so it's a great affordable option for those who are serious about their hobby.

The Kobalt XTR line of cordless power tools represents some of the best value for money that can be found in the cordless power tool market. Semi-professionals would benefit from these power tools that are 50% more powerful than their predecessors.

You can use Kobalt tools as a professional or as a homeowner without any problems. As a result of its quality and price, the brand is affordable and durable enough for casual DIYers as well as woodworkers.

Hitachi / Metabo HPT

Metabo HPT is the new name for Hitachi. Power tools are not the only products offered by the brand.

A variety of products are manufactured by Hitachi, including batteries, machinery for construction, and components for aircraft.

In 2017, the KKR investment fund acquired Hitachi's power tools division.

As Metabo HPT, it rebrands itself as a line of hand and power tools, including drills, impact drivers, cutting equipment, and more.

In spite of Metabo HPT's superior quality cordless devices and cutting equipment, its cordless tool selection is limited. For semi-professionals with a little spare money to spend, Metabo HPT remains a compelling brand.

Skil

Its U.S. headquarters remain in Naperville, Illinois, where Skil was founded in 1926.

Although it was very expensive at the time, the first product produced by the company, a worm-drive circular saw, gained immense popularity on construction sites. Despite the fact that the range now includes many different tools, Skil has long been known as "the" saw company based on this saw.

Since 1979, ownership of the company has changed several times, from the Skil Corporation to Emerson Electric to Bosch to Chevron of China in 2016, where the majority of company products are now manufactured.

It is a bit confusing for consumers, but Skil differentiates target markets by using two brand names. The Skil tools are intended for DIYers, while the Skilsaw tools are for professionals. These differences are reflected in specifications and prices.

Husky

There is a common misunderstanding between “Husky” and Husqvarna, the well-known garden equipment manufacturer. Husky Tools is completely unrelated, born out of Husky Wrench of Milwaukee, Wisconsin, founded in 1924. After various ownerships, Stanley Tool acquired the brand in 1986. In addition to supplying The Home Depot exclusively, the company now owns the brand name rights.

Instead of competing in the crowded power tool market, Home Depot has opted to concentrate on hand tools, compressor-driven pneumatic tools, and a wide selection of cabinets and tool chests. Like Kobalt, Husky Tools offers quality equipment at affordable prices to satisfy the needs of the prosumer market.

IRWIN

The company was founded in 1885 by Charles Irwin in Martinsville, Ohio when he began making auger bits. In addition to drill bits, the company manufactures saws, chisels, hammers, pliers, wrenches, snippers, screwdrivers, knives, levels, and squares. Today, IRWIN is owned by Stanley Black & Decker.

IRWIN's tools have always been regarded as durable and precise, and they were originally marketed primarily to carpenters and other tradesmen. Although IRWIN's production is primarily carried out in China, the company appears to have retained its reputation despite critics. Despite being expensive, these tools remain a contractor standard and are popular with DIYers who are willing to pay for high-quality tools.

WEN

WEN is based in Elgin, Illinois, and was founded in 1951. The company primarily focuses on design, research, and development in the U.S., while production happens in the Far East.

WEN offers a wide range of power tools, generators, and garden equipment. The company's power tools are invariably durable and reliable, despite sometimes not using the latest innovations. Independent reviewers often rate WEN as the best tool brand for the money.

Festool

It is no secret that Festool tools are extremely expensive. The German company makes some of the most expensive cordless tools on the market. Festool focuses on construction and carpentry tools, and it promises perfection in the tools it manufactures.

Porter-Cable

Porter-Cable is a well-known American power tool manufacturer. Founded in 1906, it has a rich history of innovation, including the introduction of the first portable belt sander and helical-drive circular saw. The brand is renowned for its range of power tools, including drills, saws, sanders, and air compressors. Porter-Cable tools are popular among both professional tradespeople and DIY enthusiasts for their reliability and performance.

Hilti

Hilti is a Liechtenstein-based multinational company that develops, manufactures, and markets products for the construction, building maintenance, and mining industries, primarily to the professional end-user. Established in 1941, Hilti is known for its high-quality power tools, software, and technology-based services. The company has a strong reputation for innovation and offers a wide range of products, including drilling and demolition tools, direct fastening systems, and firestop systems.
